WORK EXPERIENCE

Software Developer (Flutter)

Jio Platforms Limited

Jul 2023 – Present

Navi Mumbai, India

- Architected **People First**, an enterprise Flutter application used by more than **50,000 employees**
- Delivered over **10 production-ready modules**, including Attendance, Payroll, Reimbursements, PMS, Benefits, and Self-Service
- Engineered travel and campus features covering bookings, approvals, RSports, CRBS, food ordering, and bus tracking
- Optimized offline-first data handling using secure local storage and background synchronization, reducing API usage by approximately **40 percent**
- Enabled real-time notifications and analytics using Firebase Cloud Messaging and Crashlytics
- Secured application access through OAuth 2.0 authentication, biometric login, and role-based permissions
- Collaborated with backend, QA, and product teams to resolve production issues and meet defined release timelines

KEY PROJECT

People First – Enterprise HR Application

Flutter | Dart | Firebase | REST APIs

2023 – Present

Reliance Industries Limited

- Consolidated HR, travel, and campus services into a single enterprise mobile platform
- Designed multi-level approval workflows for leave, travel, and reimbursement requests
- Integrated Thomas Cook APIs to enable real-time travel booking and expense tracking
- Improved application responsiveness through modular architecture and targeted performance optimization
